GAP

Global Abrasive Products

A **DYNABRADE** Company

The Future of Durable Abrasive Products

Global Abrasive Products, Inc. is pleased to provide you with our new full-line catalog. GAP's core values center on service, quality, competitiveness, and product breadth. As well, we have put together a talented team of technical sales people to provide you solutions to all your abrasive needs.

GAP maintains a large inventory of both raw material and finished products allowing for just-in-time delivery on your abrasive orders. Our state-of-the-art equipment, lean manufacturing methods & continuous improvement programs are constantly striving to provide the best delivery in the industry.

GAP's three converting plants produce sanding belts to 64" wide, non-woven surface conditioning belts, adhesive backed and hook & loop discs, rolls and sheets. In addition, GAP produces a full line of specialties including cross pads, square pads, flap wheels, flap discs and many other finishing and polishing products.

Our commitment to service is evident in the vast inventory of finished goods such as cut-off wheels, sticks and stones, tool room wheels, fiber discs, shop rolls, floor sanding products and many other ready-to-ship abrasive items.

We would like to thank you for your support and express our sincere appreciation for the growth opportunities you have provided us.

– The Global Abrasive Products Team

Belts

R205 Narrow Cloth Belts

Y weight, closed coat, polyester resin cloth, Zirconia. Fast cutting for heavy grinding applications. Suitable for cast iron, stainless steel, nickel steel, alloy steel, tool steel, etc. Contact customer service for current available specifications.

Also available in other product specifications, with and without grinding aids, in J-wt., X-wt., & Y-wt. backing. Also, other minerals; Premium Aluminum Oxide, Zirconia, Ceramic and Silicon Carbide.

For other materials see pages 140 - 143.

Belts

R203 Narrow Cloth Belts

Y weight, closed coat, polyester resin cloth, Zirconia with a grinding aid to reduce heat buildup. Fast cutting for heavy grinding applications. Suitable for cast iron, stainless steel, nickel steel, alloy steel, tool steel, etc. Contact customer service for current available specifications.

Also available in other product specifications, with and without grinding aids, in J-wt., X-wt., & Y-wt. backing. Also, other minerals; Premium Aluminum Oxide, Zirconia, Ceramic and Silicon Carbide.

For other materials see pages 140 - 143.

Part Number Prefix— 801034

Belts

S181 Wide Cloth Belts

Y weight (024 - 080), X weight (100 - 600), closed coat, resin cloth, Silicon Carbide. Our premium belt for wet or dry applications. Fast cutting for glass, ceramic, artificial stones, asbestos, cement, stone, and other non-ferrous materials. Contact customer service for current available specifications.

Also available in other product specifications, with and without grinding aids, in J-wt., X-wt., & Y-wt. backing. Also, other minerals; Premium Aluminum Oxide, Zirconia, Ceramic and Silicon Carbide.

For other materials see pages 140 - 143.

Part Number Prefix— 801034

Belt Cleaning Sticks

Makes belts look and perform like new. Removes abraded material lodged between abrasive grains. Helps prevent burning, chatter marks, and machine vibration caused by loaded belts. Increases uniformity of finish. Decreases costly down time.

Not intended for use on wide belt or conveyor type sanders.

Part Number Prefix— 801034

Belt Cleaning Sticks

Size	Description	Part No.	Min./Unit

2 x 2 x 12	#2 Belt Cleaner Stick	99995	1/5

Graphite Coated Canvas Rolls

This heavy duty friction fighter will withstand high pressure applications. Sanding belts will last longer as a result of the graphite lubrication and cooling effect.

Available in rolls and sheets

Part Number Prefix – 801034

Ceramic Plus

Ceramic is the best choice when grinding stainless steel and high nickel alloys. It provides more efficient stock removal than Aluminum Oxide and Zirconia. The addition of a grinding aid provides cooler cutting and less loading.

Part Number Prefix – 809775

Precision molded and balanced. Made of high strength neoprene and engineered for true high speed operations. Reinforced at the locking surface to ensure a close fit and a true plane concentric to mandrel.

Trim-Kut® Discs are made of premium Aluminum Oxide grains bonded to a durable polymer backing. The result is a highly versatile grinding tool which requires no backing pad.

These cool cutting, rapid stock removal discs may be trimmed as needed to expose fresh grinding surfaces.

Mini Flap Discs

Zirconia & Ceramic

Utilizing technology advancements in abrasives, adhesives and automation, this high performance flap disc will improve productivity and become a favorite tool in your plant. Its special flap design can accomplish two operations in one step - grinding and finishing. Extended life over conventional quick change discs of at least 5 to 1 make this product one of the most effective breakthroughs in the small disc market.

Zirconia

A superior material due to its uniform particle size, aggressive cut and premium blend of ingredients. Great for cleaning weld lines, weld spatter, deburring, deflashing, removing rust, blending or general stock removal in narrow and small areas.

Part Number Prefix – 809775

Zirconia

Flap Discs

Ceramic, Zirconia & High Density Zirconia

Ceramic

Ceramic flap discs are the best choice for grinding stainless steel, exotic alloys and other hard metals. The ceramic mineral provides a cooler grinding surface and resultant longer life.

Part Number Prefix – 809775

Ceramic Fiberglass Backed

Up to 50% more material to increase product life.

Flap Discs

Aluminum Oxide

Made of individual flaps designed for even wear and greater durability vs. conventional fiber discs.

Use on iron, steel, leather, glass, marble, plastic and wood for stripping and cleaning.

Part Number Prefix – 809775

Aluminum Oxide Fiberglass Backed

Flap Discs

Surface Conditioning Flap Discs

Made using surface conditioning material. Used to condition, clean, and finish workpiece surfaces without undercutting the base material. They produce a brushed or lightly grained finish, especially suitable for stainless steel applications.

Available in Type 29 (Conical shape) and also come with a 7/8" arbor or a 5/8-11 threaded arbor.

Typical applications include gasket removal, coatings removal, cleaning weld splatter, and removing heat discoloration. Leaves surfaces with a uniform satin finish.

Part Number Prefix – 809775

Surface Preparation Wheels

Nonwoven unitized type material bonded to a firm backing provides strength.

Designed with a medium density unitized type material for use on all types of angle grinders. Ideal for breaking an edge, removing light scratches, blending parting lines and producing a brilliant finish.

Exceptional product for creating architectural or decorative finishes on stainless steel, brass, bronze and aluminum.

Part Number Prefix – 809775

Flap Wheels

Mounted Flap Wheels with 1/4 Shank

Designed for finishing, smoothing and polishing of metal surfaces. Adaptable to forms having convex or concave surfaces, cylinders, cavities, etc. Delivers a smooth, polish-grind action on flat, contoured or intricate surfaces with ease and safety.

Reduces labor costs on many applications formerly finished with wire brushes, rubber points, felt bobs or cartridge rolls.

Recommended for blending and polishing fine die work, draw marks, machine burrs, casting flaws, spot welds, valve corrosion and fiberglass forms.

Part Number Prefix – 809775

Flap Wheels

Unmounted Flap Wheels

Abrasive flap wheels have proved to be the best soft abrasive wheel for blending and polishing jobs in production work as well as miscellaneous clean up and maintenance jobs. The controllable aggressiveness, working speed and low cost of the wheels make them, on many applications, superior to wire brush, fibrous and setup wheels in a wide range of applications. Ideal for use on all metals (ferrous and non-ferrous), plastic, rubber and wood.

Packaged in boxes. Ask about our new Felt Polishing Wheels.

Additional discounts available on 9x11 sheets, for orders over 1000 pcs

Emery Cloth Sheets

Natural Emery abrasive grain bonded to a flexible cloth backing removes rust, scale and thin coatings on metals. Also used for removing burrs, cleaning and polishing metal. May be used dry or with oil.

Part Number Prefix – 809775

Emery Cloth

Size	Extra Coarse	Coarse	Medium	Fine	Min./Unit
9 x 11	22100	22103	22106	22109	50

Additional discounts available on 9x11 sheets, for orders over 1000 pcs

Crocus Cloth Sheets

Crocus is a natural mineral used for extremely fine finishing and polishing.

Part Number Prefix – 809775

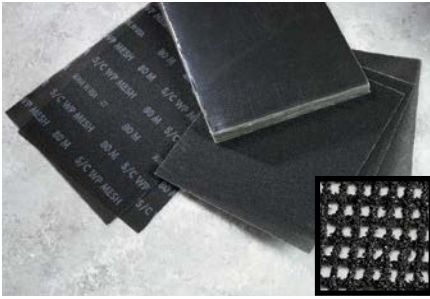

Crocus Cloth

Size	Crocus	Min./Unit
9 x 11	22150	50

Additional discounts available on 9x11 sheets, for orders over 1000 pcs

Sheets

Silicon Carbide Mesh Sheets

Strong mesh backing specially designed to reduce loading and glazing problems. Screen material coated on both sides with long lasting abrasive.

Part Number Prefix – 809775

Silicon Carbide

Floor Sanding Products

Floor Sanding Paper Discs

Abrasive floor products are available in Silicon Carbide grain ranging from 12 (4-1/2) grit to 120 (3/0) grit. These products are designed to provide superior results in the floor sanding trade.

12 (4-1/2) grit to 24 (3) grit have an extremely strong combination backing.
36 (2) grit to 120 (3/0) grit have a heavy duty "E" weight paper backing.

Part Number Prefix – 809775

Specialties

Cross Pads

Ceramic

Ceramic Cross Pads are the most aggressive and durable pads being used for polishing and finishing of cylinders and tubing, or blending radii. Grinding aid provides cooler cutting on heat sensitive alloys. Cross Pad design allows for control of stock removal since it is possible to see through the pad when it is in motion. Furnished with threaded eyelets for quick change by the operator.

Aluminum Oxide

Cross Pads are used for polishing and finishing of cylinders and tubing, or blending radii. Cross Pad design allows for control of stock removal since it is possible to see through the pad when it is in motion. Furnished with threaded eyelets for quick change by operator.

Also available in Aluminum Oxide X and J weight resin cloth.

Sharp, Silicon Carbide grain on X-weight backing. Slashed pattern gives flexibility in sanding contour shapes. Loadings used to refill Vonnegut wheels to sand intricate shapes and dimensions.

Primarily used for woodworking, but can also be used for finishing metal, plastic and fiberglass.

Specialties

Sanding Sponges

Medium Duty, 1/2" Thick

Versatile 1/2" thick sanding sponge with abrasive on two sides, specially designed for obtaining extremely fine and uniform finishes on wood, metal, paint and plastics.

Unique construction allows superb finishes of almost double the grit size of conventional sandpaper to be obtained. Can be used wet or dry.

Part Number Prefix – 809775

Medium Duty

Size		60	80	100	150	180	220	Min./Unit

Specialties

Cartridge Rolls

Cartridge rolls are ideal for finishing operations on inside diameters, lapping operations and most irregular surfaces. Their self-renewing feature of wearing through one layer of abrasives to expose the layer beneath makes them an excellent tool for blending where high finishes are required. They are available in a wide range of sizes and grits for every type of application.

Straight Cartridge Rolls

Half Tapered Cartridge Rolls available upon request, as well as other sizes and grits.

Specialties

Cartridge Roll Mandrels

Mandrels should be ordered with a shank diameter to fit the power tool collet or chuck. Equally important is the specification of the diameter of the mandrel pilot on which the cartridge roll is mounted. Usually a 1/8" diameter pilot is used for rolls up to and including 1/2" diameter. Rolls from 1/2" up to and including 1" in diameter usually require 3/16" or 1/4" diameter pilots. Available in other sizes on request.

Part Number Prefix - 809775

Non-Woven Abrasives

Strip-It Wheels

Strip-it is an aggressive abrasive product for mechanical cleaning operations. Strip-it products are made of abrasive grains and resins bonded to a strong nylon filament. The open nature of the product allows for reduced loading and a cooler cut enabling the product to last longer while still providing consistent surface finishing.

Applications include automotive, marine, metal working, fiberglass, plastic, and cleaning of stone and cement.

Type 1

Mainly used for the removal of rust, scale, oxides, and protective coatings.

These wheels are to be used in conjunction with the appropriate Strip-It wheel adapter.

Part Number Prefix – 809775

Strip-It Wheels – Type 1

Size	Max. RPM	Part No.	Grading	Min./Unit
4 x 1/2 x 1/2	8000	42000	Extra Coarse	1/10
6 x 1/2 x 1/2	5350	42003	Extra Coarse	1/10
8 x 1/2 x 1/2	4000	42006	Extra Coarse	1/10

Adapters available upon request.

Strip-It Wheel Adapters

Used in conjunction with appropriate Type 1 Strip-It Wheels.

Part Number Prefix – 809775

Strip-It Wheel Adapters

Item Number	Code	Description

Non-Woven Abrasives

Surface Conditioning and Felt Belts

Surface conditioning belts are made with Aluminum Oxide and Silicon Carbide grain bonded to a heavy duty scrim backing.

These belts are primarily used to deburr, blend, clean, and polish a wide variety of materials with minimal stock removal.

Ask about our Felt Polishing Belts for high polish applications.

Part Number Prefix – 809775

H&L (Loop Backed)

Looped back allows for use on standard Hook and Loop pads. Some pad change over is required.

Use with Pres-Loc Disc Holder, see page 108.

Plain Backed

Flexible non-woven abrasive excellent for blending, cleaning and finishing. Use for surface preparation and finishing of metal, plastics and composites.

Use with standard SCD Pres-Loc Holder, see below.

SCD and C&F Pads and Holders

Non-Woven Abrasives

Unitized Wheels - XL Deburring

XL deburring unitized wheels are designed to minimize heat buildup on work surface.

Wheels run clean when deburring or polishing titanium, special alloys, composites, and plastics. Broad range of grades and densities allows them to be used for fine finishes on precision polished parts.

*Sold in case quantities only.
Other special cut sizes available upon request.*

Non-woven hand pads are an alternative to steel wool, wire brushes, emery cloth, etc. Completely washable and reusable.

Pres-It PSA Disc Rolls

FilmBac A/O Disc Rolls

PSA - FilmBac, LD Style

This new film-backed product is made with a premium Aluminum Oxide abrasive; it also is treated with a load-resistant size coat and is designed to provide optimal cut and life. Specially treated film backing with improved bond strength preventing mineral shelling. FilmBac products exhibit excellent performance for finish removal on metal or wood, sanding solid surface materials, composites, plastics and applications where consistent surface finish, load resistance and durability are the desired features.

100 discs per roll. 600 grit and above available in tab-style individual discs.

Part Number Prefix – 809775

Peel-It PSA Discs

Blue Ceramic Premium Discs w/ Tabs

PSA - C Weight, Tab Style

Individual tabbed disc with release paper liner. No grit or dust contamination – great shelf life. Ceramic Alumina adhesive backed paper discs. The toughest abrasive in the industry today, giving this product improved cut and performance rates exceeding 30-50%. Incorporates new bonding technology with improved anti-load properties and greater cut rates and life.

NT = No Tabs.

Part Number Prefix – 809775

PSA Disc Back-Up Pads

See Page 96

Peel-It PSA Discs

Zirconia Resin Cloth Discs

PSA - Y Weight

These heavy duty Zirconia cloth discs utilize a pressure sensitive adhesive for economical and efficient disc mounting. Simply remove the protective release liner and apply to your sanding pad or platen. No other adhesives are necessary. These discs are designed for maximum cut rates on hard to grind materials and heavy duty applications. The zirconia grain gives a cool cut and extra life for maximum performance and lowest overall grinding cost.

Part Number Prefix – 809775

Peel-It PSA Discs

A/O Heavy Duty Paper Discs

PSA - F Weight

Aluminum oxide grain, resin bond on tough F weight paper backing. Excellent adhesion. Easily removed without leaving residue on holders or backing plates. Recommended for steel, stainless steel, fiberglass, hardwoods and sanding operations where loading is a problem. Large diameters used in pattern shops and non-ferrous foundries.

Part Number Prefix – 809775

Pres-It PSA Holders

Refill Roll Holder

Refill Roll Holder for PSA Rolls

Designed to dispense sandpaper from roll cartridge on holder. Ergonomic design makes it comfortable to use and puts less stress on hand. Good results with even pressure on the work piece. Sand corners with flat end and sand contours with round end.

Part Number Prefix – 809775

Refill Roll Holder

Size	Part No.
2-1/2	45660
3-1/4	45665

Hand Block for PSA Rolls

Soft molded foam with easy release vinyl face. Excellent for leveling of work piece or following contours. Ergonomic design reduces stress on hands which promotes increased productivity.

Part Number Prefix – 809775

Hand Block

Size	Part No.
5 x 2-3/4	45670

Peel-It PSA Strips/ Sheets

Aluminum Oxide Resin Cloth Sheets

PSA - X Weight

Aluminum oxide resin cloth. Use to finish and polish intricate fillets, radii or other contoured forms. Works well on straight sided blocks, tapered or half-round shapes. Excellent for die touch-up work and knife or blade sharpening.

Also available in J weight.

Part Number Prefix – 809775

Peel-It PSA Triangles

Gold A/O Stearated PSA Triangles

PSA - B, C & E Weight

Aluminum Oxide adhesive backed paper triangle fits detail sanders. Use for wood or metal for difficult to reach work areas.

Available in shapes for these manufacturers: Dynabrade, Fein, Milwaukee, Porter Cable, Ryobi, Skil/Bosch.

Also available in FilmBac and X & J weight resin cloth materials.

Part Number Prefix – 809775

Pres-Loc H&L Discs

FilmBac A/O H&L Discs

Hook & Loop—FilmBac

Our finest quality Aluminum Oxide, resin bond loop backed film discs. Special coating resists loading. Ideal for sanding paint, primer, metal, wood, fiberglass and plastic. More durable than paper backed discs. Specially treated film backing with improved bond strength preventing mineral shelling. Pres-Loc hook and loop fastening system allows for quick changes and less downtime. Available with or without vacuum holes for use on random orbital or low speed DA sanders.

Also available in rolls and cut sheets.

Part Number Prefix – 809775

Pres-Loc H&L Discs

A/O Heavy Duty Paper H&L Discs

Hook & Loop - F Weight

Aluminum oxide grain, resin bond on tough F weight paper backing. Pres-Loc H&L discs are easy to take off. The slightly used discs can be saved and used again.

Recommended for steel, stainless steel, fiberglass, hardwoods and sanding operations where loading is a problem. Large diameters used in pattern shops.

Also available in Pres-Loc Resin Cloth Discs.

Half Moon Sanders

Attach the disc to the Half Moon Sander and realize the ease of hand sanding.

This hand sander lessens the strain put on the hands as compared to sanding with cut and or folded sheets. It also allows for a more uniform sanding pattern eliminating marks caused from fingers or the uneven surface they create. It comes in multiple thicknesses – 1/8", 1/4", 3/8" and 5/8". The various thicknesses allow you to fit it to the right job or space.

Part Number Prefix – 809775

Pres-Loc H&L Discs

FabraFoam H&L Discs

Hook & Loop - FabraFoam

Specially designed abrasive coated fabric on foam with a hook and loop attachment system provides for better finishes without deep scratches. FabraFoam also allows for grinding and polishing at the same time. On clear coat finishing it reduces compound finishing time and makes a desirable matt or gloss finish on solid surfaces. Can be used on solid surfaces, composites, wood, automotive and metal polishing.

Part Number Prefix - 809775

See Page 108

FabraMesh H&L Discs

Hook & Loop - FabraMesh

Open mesh with loop backing, Aluminum Oxide grain using a resin over resin bond. Suitable for primer sanding, solid surface, composites and wood. This mesh provides the best "dust free" solution available today. It reduces dust from the sanding process, reduces loading and clogging which in turn results in a cleaner environment, greater efficiency and longer life.

Change your pad to a different type attachment style. Cost effective & efficient.

You do not need to purchase a new pad... just convert it.

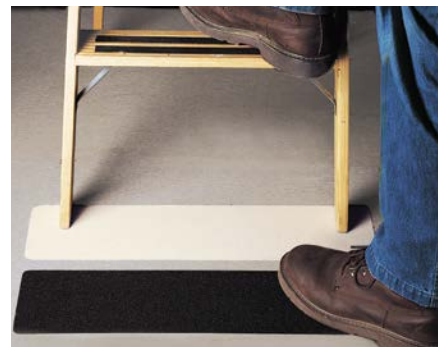

Shur-Step Non-Slip

Shur-Step Cleats and Rolls

Shur-Step is made of waterproof material permanently coated with hard and durable synthetic minerals impervious to grease, oil, water and most other contaminants. The backing is coated with a specially developed pressure sensitive adhesive that is compatible with most smooth clean surfaces. Available in cleats, strips and rolls. Custom die cut shapes are also available.

Shur-Step is designed for use in high traffic areas or as a non-skid surface on O.E.M. equipment. Ideal for application to various products and areas including mobile homes, RV's and trailers, off-road and farm equipment, snow machines, boats, pools, skateboards and exercise equipment.

Shur-Step is available in three standard types. Shur-Step Rolls are available in custom shapes and sizes.

Part Number Prefix - 809775

Shur-Step Cleats

Size	Shape	GP - Medium	HD - Coarse	GP - Clear	Min./Unit
3/4 x 24	Cleats	48000	48003	48006	1/8
6 x 24	Cleats	48010	48013	48016	1/1

Cleats are sold in box quantities of 50 pieces.

Part Number Prefix - 809775

Shur-Step Rolls

Size	Shape	GP - Medium	HD - Coarse	GP - Clear	Min./Unit
3/4 x 60 ft.	Roll	48100	48103	48106	1/16

2 x 60 ft.	Roll	48120	48123	48126	1/6
4 x 60 ft.	Roll	48130	48133	48136	1/3
6 x 60 ft.	Roll	48140	48143	48146	1/2
12 x 60 ft.	Roll	48150	48153	48156	1/1
24 x 60 ft.	Roll	48160	48163	48166	1/1

Available in custom shapes and sizes.

General Purpose Medium

Standard used for most applications.

Color - Black.

Heavy Duty Coarse

When increased traction is required or for severe use applications.

Color - Black.

General Purpose Clear

Apply this material over stenciled cautions on floors, stairs, ladder treads or ramps. Allows visual prompts to be seen and provides careful footing.

Color - Clear.

Depressed Center Wheels

General Purpose - TP27

A24R - General purpose; grinds aggressively in a wide range of metal applications.

A60R - Fast cutting thin wheel for use on metal, stainless, and other alloys. Designed for grinding and cutoff applications.

Type 27

Part Number Prefix - 662953

Depressed Center Wheels

Classic Touch Wheels - TP27, TP27T

This special depressed center wheel has a waffle-type grinding surface that provides a cooler grind, improved chip removal and minimal discoloration. Its light weight and special structure delivers reduced noise and low vibration when grinding.

This wheel has universal use: it can be used for stainless steel and nonferrous metal grinding. The wheel can also adapt to various workpieces for grinding, deburring and shaping work.

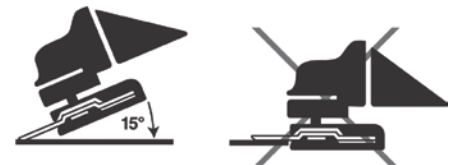

Part Number Prefix— 662953

Aluminum Oxide

Depressed Center Wheels

Rex-Cut® Wheels - TP27, TP27T

GFX Bond - Use this bond for fine finishing, blending, and polishing applications on ferrous and non-ferrous metals. It resists loading and is resilient for use on contours making these wheels ideal for stainless steel tanks, vessels, and other fabrications. Excellent for stainless steel.

MTX Bond - Use this bond for light or medium weld removal. Its resilient bonding provides smooth grinding action and permits easy control of cutting rate. It resists loading and offers excellent results for grinding aluminum or ferrous materials where finish is important. Excellent for aluminum.

Cotton reinforced wheels are widely used for a variety of applications requiring metal removal and finish. They differ from other bonded abrasives by their unique construction, as well as grinding and smooth finish capabilities.

Small Diameter A/O

Aluminum oxide general purpose:
These small diameter cutoff wheels are for use on die grinders, small wheel grinders, and some end grinders.

Cut-Off Wheels

Small Diameter Zirconia Cutoff Wheels

These wheels utilize a zirconia grain providing a fast cut with an extremely long life. Ideal for hard to grind materials such as stainless steel and high tensile alloys.

Cut-Off Wheel Adapters

Description	Part No.
FS1414 Screw Type-1/4" Wheel Arbor	30000
FS1438 Screw Type-3/8" Wheel Arbor	30003
FS142X Screw Type-1/4" & 3/8" Wheel Arbor	30006
FM1414 Nut Type- 1/4" Wheel Arbor	30009
FM1438 Nut Type- 3/8" Wheel Arbor	30012
FM1412 Nut Type- 1/2" Wheel Arbor	30015

Cut-Off Wheels

Type 1 Reinforced Cutoff Wheels

A36TB, A46TB, A60TB - General purpose metal/stainless: For fast, easy cutting of steel with portable tools. Excellent performance in construction and fabrication. Long life on stainless.

A36RB, A46RB - Stainless steel and hardened steels: Cool, fast cuts. Burr free cuts on stainless steel sheet and profiles.

A60R - Fast cutting thin wheel for use on metal, stainless, and other alloys. Designed for grinding and cutoff applications.

C30UB - General purpose for concrete and masonry products: Durable reinforced wheels. Silicon Carbide grain for quick cuts on brick, block, and all concrete and masonry products.

Reinforced cutoff wheels can transform any portable saw into a fast, effective, economical tool to cut steel as well as concrete, brick and masonry products.

FABCO - FABCO products are economically priced versions of our GAP brand of wheels. FABCO Brand items perform well and can be a cost effective solution on many applications.

Cut-Off Wheels

Stationary Wheels

Cut-Off Performance Tips - In most operations, a faster, cooler cut can be achieved by minimizing the contact area between the cut off wheel and the work piece. This is achieved by securely clamping the work in position which affords the least contact for the duration of the cut.

Note: Always place the material in such a way that it can be securely clamped.

Part Number Prefix - 662953

Cutoff wheels for dry cutting on stationary machines. Designed for use on popular chop stroke machines, oscillating machines, and other cutoff machines where the work is fixed and the wheel's cutting plane is controlled.

Fast cutting general purpose grade for structural steels, bar stock, tubing, mild stainless steel and alloys.

Chop Saw Wheels

Cutoff for metal cutting on chop saws. Reinforced resinoid wheels for fast, safe, clean cutting in the shop. Best general purpose grade for 12", 14", and 16" saws. Fast and burr free cutting in all profiles; angles, channel tubing, solid, mild, or stainless steel.

Cut-Off Wheels

Portable High Speed Gas Saw Wheels - A/O

Aluminum Oxide - For on-site cutting of metal. Constructed of quality Aluminum Oxide grain, a unique weave of extra high tensile fiberglass reinforcing, and specially formulated resin bonds.

A24SB - For all job site profiles in mild steel and stainless steel including re-bar, pipe, and structural profiles. The all-around performer in metal cutting.

A24TB - For applications requiring sturdy wheels that withstand severe dressing action experienced in cutting sheet steel. Made from wear resistant Aluminum Oxide, this custom grade provides quick cuts and unsurpassed life.

A30PB - Designed for rail cropping, this versatile grade will give straight, fast cuts on all sizes and weights of rail – new, heat treated alloy, or wear hardened.

Part Number Prefix - 662953

Portable High Speed Gas Saw Wheels - S/C

Silicon Carbide - Cutoff for concrete cutting on high speed portable gas and electric saws. For on-site cutting of masonry and concrete. Constructed of quality Silicon Carbide grain, a unique weave of extra high tensile fiberglass reinforcing, and specially formulated resin bonds.

C30UB - The proven performer on concrete (green or cured), brick, block, clay pipe and other masonry products.

C16UB - Made of extra coarse Silicon Carbide grain, this wheel has aggressive, free cutting action on asphalt.

Part Number Prefix - 662953

Cut-Off Wheels

Portable High Speed Gas Saw Wheels - A/O & S/C

Cutoff for ductile iron, cast iron, concrete lined pipe. High speed wheel made up of a combination of Silicon Carbide and Aluminum Oxide grains.

A “must” for sewer and water main construction and maintenance. Combines the razor sharp cutting properties of Silicon Carbide grain with the durability of Aluminum Oxide, thus reducing wheel wear while maintaining speed of cut in cast, ductile, and combination ductile/concrete.

Part Number Prefix - 662953

Aluminum Oxide/Silicon Carbide Blend

Silicon Carbide for Walk Behind Saws

Cutoff for wet cutting on concrete and asphalt. Made with fast cutting Silicon Carbide grain, fully reinforced for on-the-job safety.

C20SB and C24SB

For concrete, L/P – The general purpose choice for cured concrete regardless of age or aggregate. Maximizes efficiency of low powered saws.

C16UB

For asphalt – open bond structure and coarse grain for aggressive asphalt and green concrete cutting.

** L - Wheels designated with this hole size have a 1" arbor hole with a single drive-pin hole.

Vitrified Grinding Wheels

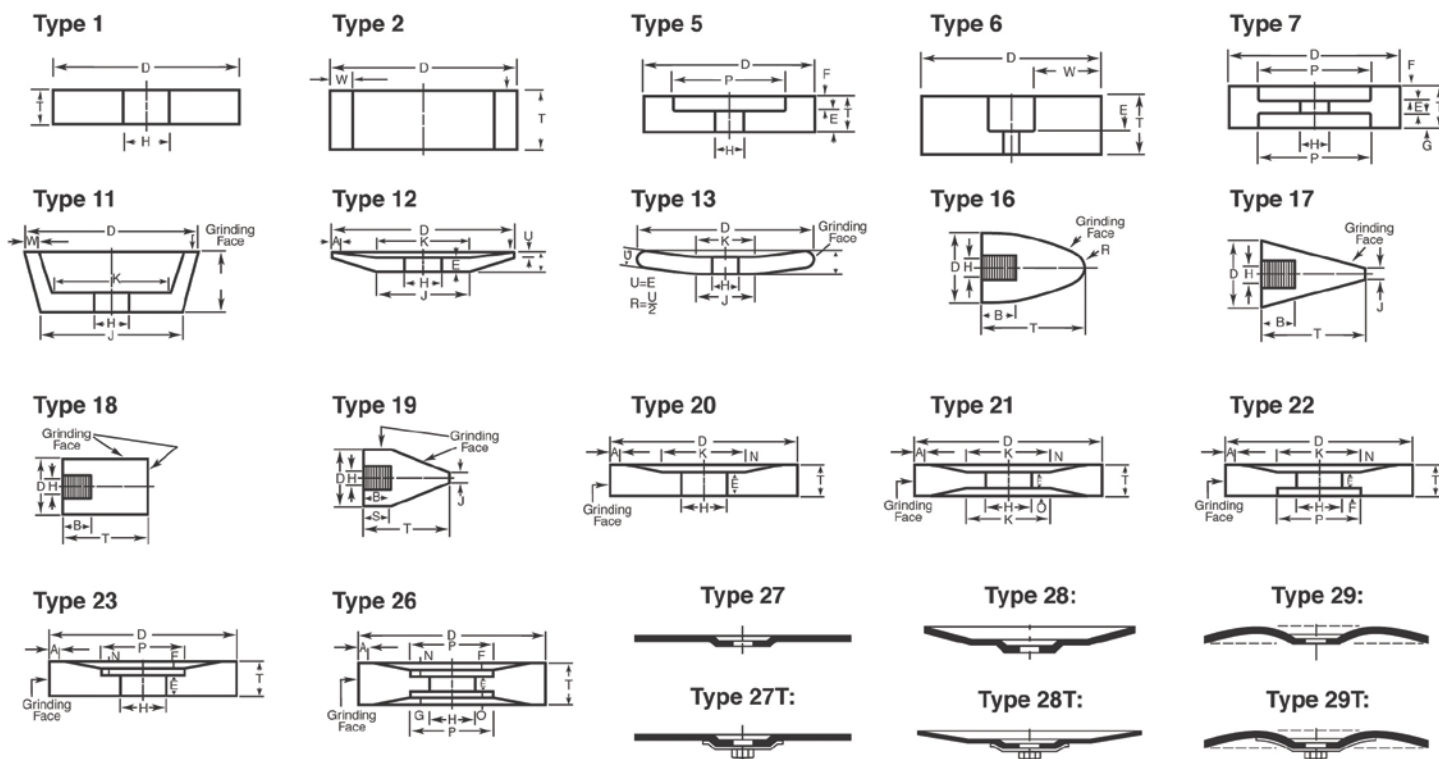

Vitrified Grinding Wheels

A - Blue/ Gray - Tough Aluminum Oxide recommended for heavy stock removal.

AA - White - Very friable Aluminum Oxide; recommended for tool steels and other heat sensitive steels.

PA - Pink - Semi-friable Aluminum Oxide; recommended for grinding materials containing high chrome. Used especially for heat sensitive steel, special and high chrome alloys.

GC - Green - Green Silicon Carbide grain for grinding cemented carbide, carbide tools, extremely hard metals, masonry tools, glass, and fiberglass.

Part Number Prefix - 662953

A - Blue/Gray

Tough Aluminum Oxide recommended for heavy stock removal.

AA - White

Very friable Aluminum Oxide; recommended for tool steels and other heat sensitive steels.

PA - Pink

Semi-friable Aluminum Oxide; recommended for grinding materials containing high chrome. Used especially for heat sensitive steel, special and high chrome alloys.

GC - Green

Green Silicon Carbide grain for grinding cemented carbide, carbide tools, extremely hard metals, masonry tools, glass, and fiberglass.

All Grinding Wheels 8" and smaller come with a telescopic bushing.

A - Blue/Gray

Tough Aluminum Oxide recommended for heavy stock removal.

AA - White

Very friable Aluminum Oxide; recommended for tool steels and other heat sensitive steels.

PA - Pink

Semi-friable Aluminum Oxide; recommended for grinding materials containing high chrome. Used especially for heat sensitive steel, special and high chrome alloys.

GC - Green

Green Silicon Carbide grain for grinding cemented carbide, carbide tools, extremely hard metals, masonry tools, glass, and fiberglass.

Wheel Accessories

Wheel Dressers & Replacement Cutters

Part Number Prefix - 662953

Wheel Dressers & Replacement Cutters

Description	Part No.
Whl Dresser #0, Up to 10" Dia.	08000
Whl Dresser #1, 10" to 16" Dia.	08003
Replacement Cutter #0 (Set of 4)	08100
Replacement Cutter #1 (Set of 4)	08103

Hand held wheel dressers are used on various bench, pedestal, and tool room wheels. These products are normally used when fast dressing is your primary requirement.

Replacement cutters are to be used on the above mentioned dressers.

Part Number Prefix - 662953

Bushings

Code	Description	Part No.
T-1	1" Wide Telescoping	30270
T-3/4	3/4" Wide Telescoping	30273
PB3	1-1/4"- 1/2"	30200
PB4	1-1/4"- 5/8"	30203
PB5	1-1/4"- 3/4"	30206
PB6	1-1/4"- 7/8"	30209

For general purpose metal working, mild steels, stainless steels, alloys; most metals, most applications. For grinding and cleaning hard to reach spots along the seams and fillets of large welded parts.

The most commonly used wheels for stock removal in such difficult areas as holes, corners & recesses. Designed for fast stock removal with minimum operator effort.

Readily available in a wide variety of these and other sizes.

Mounted Wheels

B - Shape Mounted Wheels (Cont'd)

A complete line of high speed portable grinding wheels for those difficult-to-reach work areas. Each wheel is securely mounted on a rust resistant nickel steel mandrel. Mounted wheels fit all popular drills and flexible shaft machines.

GA60PV – STOCK GRADING

Minimum Package = 25 pieces per specification

Non-stock grading's; minimum order = 100 pieces

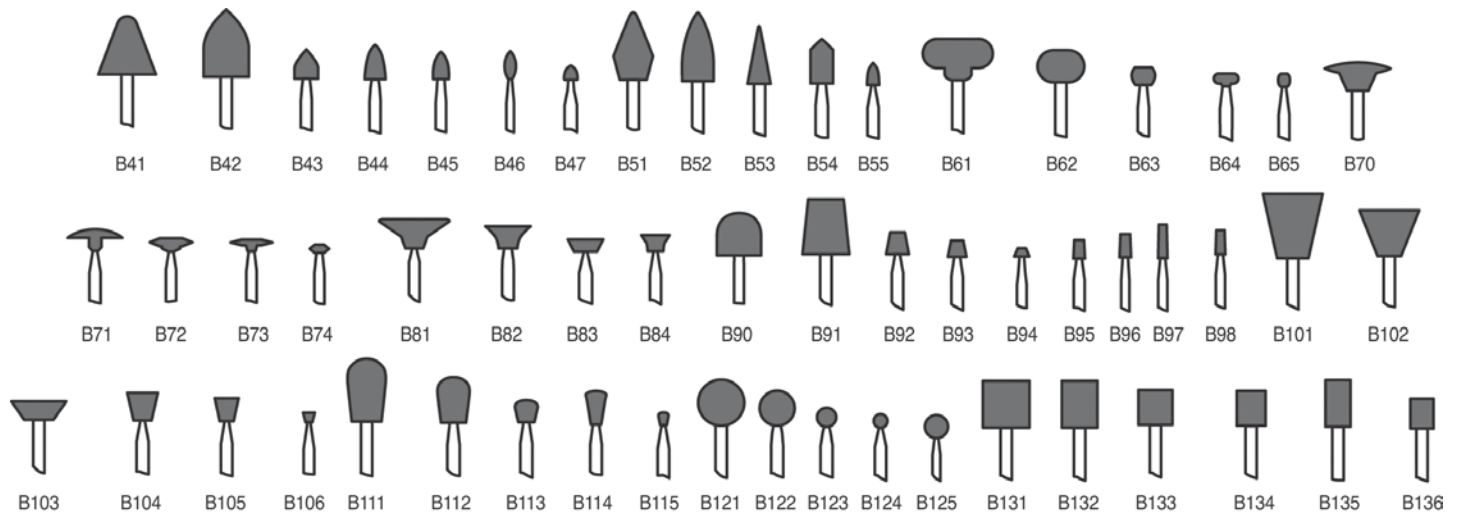

Shank/mandrel: D1 = 1/8 x 1-1/2 • D2 = 1/4 x 1-1/2 • D3 = 3/8 x 1-1/2

Part Number Prefix - 662953

Availability Chart

ALUMINUM OXIDE - Paper / Cloth / Film				
Backing	WT.	Features and Applications	General Use	Coat
POLYESTER FILM	FILM	Open Coat, Stearated, film backing for added durability and consistent finish. Available in Hook & Loop and PSA. Excellent for painted surfaces, composites, solid surface and woodworking applications.	DISCS, ROLLS, SHEETS	OC
PAPER	C	Wood, Paint, Metal - Special load resistant size coat and premium aluminum oxide mineral	DISCS, ROLLS, SHEETS	OC
PAPER	E, C, B	Wood, Paint, Metal - Special load resistant size coat with premium heat treated mineral. Cost effective product.	DISCS, ROLLS, SHEETS	OC
PAPER	F	Wood, plywood, painted surfaces, & leather. Mainly used for machine sanding operations. Narrow & wide belts. Antistatic properties provides longer life and load resistance.	DISCS, ROLLS, SHEETS, BELTS	OC
COTTON	X, J	For hand sanding. Disc, sheet or roll applications.	DISCS, ROLLS, SHEETS	CC
POLY/COTTON	J	Flexible product for polishing very contour pieces. For aluminum die cast, carbon steel, hardwood on pump sleeve.	BELTS	CC
COTTON	J	Flexible, fast cutting. Excellent contour sanding on wood and metal. Versatile premium product.	BELTS, DISCS, ROLLS, SPEC.	Semi
COTTON	J	Metal, Wood. Premium Green top sized flexible product excellent on aluminum, brass and stainless.	BELTS, DISCS, ROLLS	CC
POLY/COTTON FLEX	X	Semi-flexible product for polishing curved surfaces. For cutlery, golf club, hand tools, etc.	BELTS	CC
POLY/COTTON	X	For grinding in furniture, musical instrument, mosaic wood panels, solid wood & painted surfaces with portable, edge & stroke sanders.	BELTS, ROLLS, SHEETS	OC
POLY/COTTON	J	Flexible product for edge of contour wood sanding. Mainly used on stroke sanders but can be used on pump sleeve & sponge sanders.	BELTS, ROLLS, SHEETS, DISCS	OC
POLY/COTTON	J	Wood sanding, special stearated top coat for anti-loading properties	BELTS, ROLLS, SHEETS, DISCS	OC
POLY/COTTON	J	Highly flexible product for profile difficult shape sanding.	BELTS, ROLLS, SHEETS, DISCS	OC
POLY/COTTON	X	General metal working and specialties use.	BELTS, DISCS, ROLLS, SPEC.	CC
POLY/COTTON	Y	For metal working. Removing gate and riser from castings, surface finishing. For stainless steel, nickel alloy, tool steel etc. Fast cut.	BELTS, DISCS	CC
POLY/COTTON	Y	Wide belt use for plywood & suitable for flat sanding at high speed and mosaic wood panels. Durable & washable. Antistatic.	BELTS	OC
POLYESTER	Y	For carbon steel and alloy in wet or dry sanding. Excellent in aluminum and carbon steel sanding. Heavy duty & shelling resistance (long life), waterproof.	BELTS	CC
SILICON CARBIDE - Paper / Cloth / Mesh				
Backing	WT.	Features and Applications	General Use	Coat
PAPER	B	Wood, Paint, Metal	DISCS, ROLLS, SHEETS	OC
PAPER	C, A	Metallurgical, composites, marble, granite, painted surfaces.	DISCS, ROLLS, SHEETS	CC
MESH	N/A	Drywall, Plumbing and Floor Sanding	DISCS, ROLLS, SHEETS	OC
COMBINATION	T	Floor Sanding.	DISCS, ROLLS, SHEETS	OC
PAPER	E	Floor Sanding. All purpose floor sanding product.	DISCS, ROLLS, SHEETS	OC
COTTON	X	Metal, Glass, Wood. Premium waterproof product.	BELTS, DISCS	CC
POLYESTER	Y, X	For glass, ceramic, artificial stone, asbestos, cement, non-ferrous	BELTS, DISCS, ROLLS	CC
SILICON CARBIDE / CORK - CLOTH				
Backing	WT.	Features and Applications	General Use	Coat
WATERPROOF COTTON	X	Fine metal finishing and polishing.	BELTS, DISCS, ROLLS	CC
CORK ONLY - CLOTH				
Backing	WT.	Features and Applications	General Use	Coat
WATERPROOF COTTON	X	Final polish on stainless steel, glass and porcelain. Produces a scratch free finish. Non abrasive.	BELTS, DISCS, ROLLS	CC
ZIRCONIA - Paper / Cloth				
Backing	WT.	Features and Applications	General Use	Coat
POLY/COTTON	Y, X	Fast cutting blend of Zirconia and Aluminum Oxide. Medium grinding applications. Mild steel, wood and stainless	BELTS, DISCS	CC
POLYESTER	Y	Fast cut in heavy grinding applications. Suitable for cast iron, nickel, stainless steel, and alloys.	BELTS, DISCS	CC
POLYESTER	Y	Fast cut in heavy grinding applications. Suitable for cast iron, nickel, stainless steel, and alloys. Grinding Aid reduces heat buildup.	BELTS, DISCS	CC
POLYESTER	Y	Fast cut in heavy grinding applications. Suitable for cast iron, nickel, stainless steel and alloys.	BELTS, DISCS	CC
PAPER	F	Widely used for sanding metal, grinding & finishing stainless steel, hard woods, composites or on other hard to grind substrates	BELTS, DISCS, ROLLS, SHEETS	CC

FELT	N/A	Final polishing or finishing step, use with polishing compounds	BELTS, DISCS	N/A
FELT	N/A	Final polishing or finishing step, use with polishing compounds	BELTS, DISCS	N/A
FIBER				
BACKING	WT	FEATURES AND APPLICATIONS	GENERAL USE	COAT
VULCANIZED RUBBER	N/A	Premium Aluminum Oxide abrasive last longer than comparable discs. Cool running, Economical.	DISC	CC
VULCANIZED RUBBER	N/A	Zirconia Alumina abrasive last 2-3 times longer than Aluminum Oxide discs and will excel when grinding stainless, exotic metals. Fast and aggressive cutting.	DISC	CC
VULCANIZED RUBBER	N/A	Ceramic discs last longer than most fiber discs especially on hardened alloys, stainless steel and titanium.	DISC	CC
VULCANIZED RUBBER	N/A	Silicon Carbide discs are excellent for fast cutting on non-ferrous metals, stone, terrazzo and ceramic.	DISC	CC
FOAM HOOK & LOOP				
BACKING	WT	FEATURES AND APPLICATIONS	GENERAL USE	COAT
COATED FABRIC ON FOAM	N/A	This special abrasive coated fabric on foam with a H&L attachment system provides a fine finishing product. It can be used on solid surface, composites, wood, automotive and metal polishing.	DISCS, ROLLS, SHEETS	SEMI
MESH HOOK & LOOP				
BACKING	WT	FEATURES AND APPLICATIONS	GENERAL USE	COAT
MESH HOOK & LOOP	N/A	The full resin bond open mesh design and Hook & Loop attachment system is a great non loading product for many tough jobs. It provides a dust free solution to many of the environmental concerns of today. Longer life is a net result.	DISCS, ROLLS, SHEETS	N/A
